Kata Kunci : Peran, Pelayanan, Masyarakat

Introduction

This activity received enormous support from local agencies to all P2K students, Faculty of Teacher Training and Education, University of Muhammadiyah Makassar. The activities carried out, among others: service work cleaning public cemeteries and service work at the Nurul Falah Mosque.

As a form of our community service, we fill the Unismuh Makassar P2K work program, in the community of Maros Baru District, one of which is by planting a Living Pharmacy as a medicinal plant that can be used in making natural herbal medicines. This activity received enormous support from local agencies to all P2K students, Faculty of Teacher Training and Education, University of Muhammadiyah Makassar.

Based on the activities that have been carried out which are the formulation of the problem, namely: Are P2K students able to play a role in the field of education as a form of community service in Baju Bodoa Village.

Implementation Method

The location of implementation in this activity is Baju Bodoa Sub-District, Maros Baru, Maros Regency. The types of activities are the community work program of Baju Bodoa Village, Maros Baru District, Maros Regency, as follows: Holding Service Work at the Public Cemetery in Pangkasalo Baju Bodoa Village. Doing Service Work at Nurul Falah Mosque on Jl. Taqwa, Baju Bodoa Village, Maros Baru District, Planting a live dispensary on Jl. Taqwa Kel. Baju Bodoa, Maros Baru District.

Related Agencies in carrying out all of the above work programs were carried out because the officials of Baju Bodoa Village gave trust and support to us in Baju Bodoa Village in carrying out their work programs in the midst of the target community and the form of realization of the Baju Bodoa Village community work program, namely: Facilities provided by the Village Government / Baju Bodoa Village Community service activities

Results and Discussion

Indonesian people are social creatures who need each other, for that Indonesian people cannot live individually. One of the things that the Indonesian people do is by working bakti, with this buda will create a bond of brotherhood, because service work is an activity carried out together.

Service work is a culture that grows in the social life of Indonesian people and develops as a cultural heritage that has existed for generations (Effendi 2013).

Service work carried out together in the community has a very important impact and role in its influence, where with the service work activities carried out regularly in the community, every member of the community has the awareness to play an active role because they feel that the activities carried out have a very positive impact in terms of building togetherness in Baju Bodoa Village.

The forms of participation of P2K students in the Baju bodoa community are: In connection with the form of community participation, we from P2K Unismuh Makassar students thought of holding service work in a public cemetery because the tomb is in the same location so we took the initiative to carry out community service program activities (Posko) during P2K activities. Community participation which will be carried out on October 15, 2023, is service work at the Nurul Falah mosque by cleaning all places of worship, toilets and courtyards.

Knowledge about the use of yard land for live dispensary plants or family medicinal plants (toga) has not been widely understood by the people of baju bodoa village which is shown from the yard land around people's houses that have not been planted with live

dispensary plants. Living dispensaries are basically the use of a piece of vacant land either in the yard, field or garden that is used to cultivate plants that are efficacious as medicine (Aly et al., 2020).

Family medicinal plants are nutritious plants that are planted in the yard managed by the family, in order to meet the family's needs for their own medicines. Plants that are usually used as kitchen spices can also be used as live dispensary plants, such as ginger, turmeric, galangal, kencur and lemongrass, These live dispensary plants are used in this devotion (Parawansah et al., 2020).

We from P2K students took the initiative to carry out the planting of live pharmacies in Maros Baru District. The planting of live dispensaries is carried out for the community to make it easier to get herbs. Live dispensary planting is very beneficial for the community as herbal plants that are easy to obtain and manage.

Example:

Figure 2. Mutual Cooperation

1. Living Apothecary Planting

As a form of our community service, we are filling in the P2K Unismuh Makassar work program, in the Maros Baru District community, one of which is by planting live apothecaries as medicinal plants that can be used to make natural herbal medicines. This activity received great support from local agencies for all P2K students at the Faculty of Teacher Training and Education, Muhammadiyah University of Makassar.

Figure 4. Implementation of Living Pharmacy Planting

Technique and Implementation Schedule

1. Mutual Cooperation

To carry out mutual cooperation activities, tools are needed such as: machetes, hoes, brooms and trash cans. The activities that will be carried out are cleaning up scattered rubbish and pulling out grass that disturbs the view. During the service period, practitioners carry out mutual cooperation activities twice a week,:

- a. Sunday, October 1 2023, at 09.00 WITA. Mutual cooperation is carried out by cleaning public cemeteries that have not been cleaned for a long time.
- b. Monday, October 15 2023, at 09.00 WITA. Mutual cooperation was carried out at the Nuruh Falah mosque which is located in one of the Baju Bodoa sub-district areas.

2. Live Apothecary Planting

The planting of the living pharmacy will be carried out on September 23 2023, which will be located in the yard of the RT head's house in one of the areas in Baju Bodoa sub-district.

Evaluation and Sustainability

In this stage, activities refer to the results and findings obtained during program implementation as well as how to complete them and are evaluated in the form of table 1.

No	Name Activity	Results and findings Obtained
1.	Mutual cooperation	With this activity, the local community participates in cleaning mosques and public cemeteries so that the implementation of mutual cooperation activities can run smoothly and become a reflection for the people of Badoa sub-district to keep the environment clean without littering.
2.	Living pharmacy	By planting a live pharmacy, the community will easily get herbal medicines to use.

The conclusion that can be drawn from the discussion is 'cleanliness is part of faith' so if you like cleanliness it means you have strong faith. This service activity in the environmental reserve remains clean and makes people aware of the importance of protecting the surrounding environment.

Conclusion

Based on the results of the implementation of P2K activities that have been programmed by student practitioners in Baju Bodoa Village, Maros Baru District, Maros

Regency. On August 4 2023 - 61 days of community service have gone well according to the expected procedures. This activity has a very important impact on students and the environment they live in because they are required to adapt to the environment, atmosphere, place of residence and the language used daily. For this reason, students are able to have experience and knowledge about social relations and can apply the knowledge they have in the local community. And P2K practitioners must also follow the rules that apply in the area where they live, participate in village activities both outside and inside the P2K location. Implementation of P2K activities must also be supported by the community of Badoa Subdistrict so that the Lurah government is able to facilitate all the needs required by practitioners in carrying out their activities. The people of Baju Bodoa Village also really participate in making the activity program carried out by the practitioners a success. Thank-you note. The suggestion conveyed was for the Baju Boda village government to maximize the existing work program and add an innovative work program.
